Qualatex  
Color Curls™

Create simply stunning designs with Qualatex® Decor Shapes. Designed to be tied, taped, or banded together, these versatile balloons are easy to use and can create a variety of unique decor elements.

**Basic Inflation**

The inflation technique for Taper and Starpoint Decor Shapes is similar to that of any Microfoil® balloon. Simply inflate with a foil regulator or air inflator and you're ready to start decorating.

**Tip:**

For efficient and fast inflation, inflate Decor Shapes with nitrogen using a foil regulator, or use a Cool Aire Inflator. Be sure to inflate Shapes slowly to avoid potentially damaging the valve.

**Taping Technique**

1. Line up the top point of one inflated Decor Shape with the bottom point of the other, and overlap the excess foil that creates the pointed ends.
2. Place a small piece of clear packaging tape on either side of the overlapping points so one balloon is taped to another.
3. Repeat Steps 1-2 with additional Shapes as needed.
4. To hang from the ceiling, tightly tie a piece of monofilament to the top point of the balloon.

**Tying Technique**

1. Tie the necks (or points) of two inflated Decor Shapes together tightly. Repeat with additional Shapes as needed.
2. Arrange the Tapers or Starpoints to create the desired design, such as a Column or Topiary.

**Banding Technique**

Cut off the neck of a latex balloon and use it as a rubber band to gather the pointed ends of three or more Shapes to be attached at a central meeting point.

Taper & Starpoint shapes are specially sized so they work together!

**Taper Metallic Gold**  
**GQ #17125** 13" Air-fill  
**JL #17133** 27" Air-fill  
**HX #16335** 38"

**Taper Silver**  
**GQ #17127** 13" Air-fill  
**JL #17134** 27" Air-fill
